

STEUBEN RED BARON'S RC CLUB

MINUTES FOR May 18,2026 Submitted by Robert S Stan Secretary

The meeting was called to order at 18:05 at the flying field by President George Farwell.

TREASURER'S REPORT: <see email>. We received donations of <see email> from members for the cost of the mower shed. At present, the shed cost is \$927.

OLD BUSINESS: Expenditures for the shed are basically complete. We may need to buy a few more pieces of wood to finish the battens on the outside of the shed. Joe Mancini is still working on a draft of revised club by laws which will be approved by club members.

SAFETY OFFICER: George brought up a few safety items we should all be thinking about.

If you're flying electric airplanes, check for corrosion on all your leads. Inspections are important. Also check the hinges on all your control surfaces and make sure they are correct. No one should be flying an airplane without a failsafe set up on their transmitter—setting the throttle cut is especially important.

NEW BUSINESS: A work day is planned for May 30, with May 31 reserved as a rain day to finish the shed. We still need to complete the roof and install the battens.

The meeting adjourned at 19:25

Robert S Stan, Secretary.
